The Honourable Mr. V. V. Giri, Bar-at-law,
Minister for Industries, and Labour.

Memorandum presented on behalf of the

"Puttur Division Mahali Prevention Co-operative Society, Limited,"
PUTTUR.

Sir,

We extend to you our most cordial welcome on your first visit to this district of ours. We take this opportunity of submitting for your kind consideration a few of our grievances, the redress of which might even then touch only the bare fringe of the problems facing this society.

The "Puttur Division Mahali Prevention Co-operative Society, Limited," Puttur, was ushered into existence on the 22nd of November 1936, with a view to give relief to agriculturists owning areca gardens, and to combat the raging 'Mahali Pest' by such measures as are necessary. The Society has at present a membership of 453 and the loans outstanding against members form an aggregate of Rupess 22,779-4-0. The loans from the Central Bank to this society amount to Rs. 19655/-. The individual maximum borrowing power has been limited to Rs. 400/ and the paid up share capital now is Rs. 4630/-.

One of the chief agricultural products of this district is areca. With the heavy economic depression and the 'Mahali Pest' spreading like wild fire from garden to garden and village to village, the lot of the already impoverished malaria-stricken agriculturists is too pathetic to be described in adequate words. The areca gardens cover an acreage of 18000 acres in the district. In the Puttur Taluk alone there are 8000 acres of areca gardens, mostly cultivated as home farm by the agriculturists. Needless to add that their chief source of income, and at times the only source, is areca produce.

It looks as if the pest is the last straw on the agriculturist's back. The entire areca produce in the district may be estimated at 33,000 candies. More often than not, in many villages in the district when the 'Mahali Pest' first reared its ugly head, there was no income at all to a majority of the agriculturists from these gardens. It was the duty of the agricultural department to help the ryots. To meet such a contigency, and supply the necessary chemicals and sprayers to the agriculturists, the society was started in November 1936.

We take pride in stating that this society has rushed to the rescue of the groaning agriculturists at a time when the Government could and should have done much to amelicrate their conditions.

The audit report no doubt discloses a profit of Rs. 515-10-0 which cannot be taken as a standard in the years to come. The profit realized this year was due to the exceptional facts that the Society levied admission fee, and also commission on sprayers and chemicals, things which are not of a recurring nature in the years to succeed. The Society may be constrained to pay interest even before it sells the chemicals and sprayers now in stock and may even be obliged to work at a loss.

We feel we would be asking but little, if on behalf of the society, in the interests of the people and Government itself, we request that the following grievances be immediately redressed.

(a) The society desires that... tour from village to village by way of propaganda of the society, to devote his entire attention in helping the Society by enlisting more members, to assist in the matter of issuing loans to proper persons and also in collecting the same. His expenses must be borne by the Government itself, since this society is not intended to make profits out of the agriculturist's lean purse.

(b) The audit fee be borne by Government itself, or be made very nominal since the society is in its infancy.

(c) This society prays that it may be exempted from paying duty on chemicals and sprayers supplied to them.

(d) That since this society is obliged to borrow money from the Central Bank at 5% per annum the Provincial Government itself may be pleased to advance money to this society at 3% per annum.

Thanking your Sir, for the patience with which you have heard us, and hoping that we have not pleaded in vain.

We beg to remain

Sir,

your most obedient servants,

President and Secretary

HARI HARA PRESS, PUTTUR.

PUTTUR DIVISION MAHALI PREVENTION CO-OPERATIVE SOCIETY LTD.

1. Date of Starting. — 22nd November, '36.

2. Area of operations:

(a) No. of villages and hamlets included in the area of operations --- Villages of Puttur and Kasaragodu Taluks in the Districts of South Kanara.

(b) Distance from the head-quarters of the Society to each hamlet or village -- 46 miles to the farthest village.

3. Objects.

(1) To combat the "Mahali Pest" by taking all such steps and measures as are necessary or advised by the Agricultural department for its prevention and extermination.

(2) To purchase and store for supply to members sprayers, chemicals and other requisities for spraying for protection of areca crops from the pest.

(3) To help members with loans and other-wise for the above purpose and

(4) Generally to do all such other things as are incidental or conducive to the above objects and as may be determined by the general body of members from time to time.

4. Membership.

marks.

It was found that many garden owners were unwilling to join unlimited liability village credit societies, and in many villages there were no such societies. Hence the special type of society on limited liability basis which was found to be in a better position to organise and help the garden owners.

2. The S.C.C.C. Bank assisted the society with cash credit loans amounting to Rs 19000. at the reduced rate of 5%.

3. The sprayers and chemicals were purchased in bulk and therefore at favourable rates of prices. The private traders who exploited the needy garden owners in the previous year and made exhorbitant profits in the trade, (the ryots trying to equip themselves with sprayers and chemicals only when the pest actually appeared in the gardens) were obliged this year to narrow down their profits margin of profits very much. The gain accruing to arecanut garden owners by the timely organisation of the society and the measures taken must be very considerable; for failure to do so would have resulted in loss of several hundreds of rupees to each of the bigger garden owners and comparatively smaller sums to smaller owners by way of damage to crops and fields.

4. The total area land owned by members of the society maybe roughly estimated to be 3000 acres, and the total produce about 6,000 candies. The total extent of gardens sprayed with the society's help of members and others is about 4,000 acres.

C. No. 7822/37

Station Madras, *Dated the* 5th December 19 37.

From (Name) T. Austin Esq., I.C.S.,
(Designation) Registrar of Co-operative Societies,
Madras

To The Secretary to the Government of Madras,

Development Department.,
Fort St. George,
Madras.

Sir,

Ref:- Development Endt. No.2407-V/37-1 dated 19th October 1937.

I submit the following remarks on the four requests made in the memorandum sent to me along with the Government Memorandum quoted above:

The first request is for the appointment of an Inspector for propaganda, for enlisting more members, and helping the society in issuing and recovering the loans. In November last at the time of the registration of the society, I requested Government in my letter No.C.7639/36 dated 4th November 1936 disposed of in G.O.MS. 2222 (Dev.) dated 8th December 1936 to sanction a Junior Inspector for a period of 3 years to manage and supervise the society. Government,

however, sanctioned, a Junior Inspector for a peri(only 6 months and ordered that after this period the society should make its own arrangements for attending to collection and other work and for keeping accounts. In accordance with these orders a Junior Inspector is working in the society and will remain there till 31-1-1938. Apart from the supervision of the society, a Government Inspector is necessary to do propaganda and see that all the arecanut growers join the society to stamp out the disease effectively. As it is, out of 12,259 acres under arecanut cultivation in Puttur and Kasaragod Taluks, spraying was done only in 1525 acres. In view of this I request that Government may be pleased to permit the present Junior Inspector to work in the society up to 31-10-1938.

2. The society need not be exempted wholly from the payment of audit fees; I shall remit it either in whole or in part from time to time with reference to the financial condition of the society.

3. The third request of the society is for exemption from payment of duty on chemicals and sprayers supplied to it. It is not desirable to show discrimination in favour of the society as against private purchasers.

4. The last request of the society contained in the memorial is that it may be granted loans by Government at 3 % per annum. The rate of interest charged by the Central Bank is 5% which is sufficiently low compared with the ordinary lending rate of 6½%. The society charges 6% on loans issued to members. In ordinary credit societies the lending rate to members is 7½%. The members of the 'Mahali' society are therefore getting money at cheaper rates. At present the security for loans issued to members is twofold:- (1) the produce grown in the arecanut garden and

(2) joint and several liability of the borrower and

one or two sureties. If the crops fail, the only security is the personal security. Unlike building and sale societies, this society cannot offer tangible immovable property as security. To issue loans for the purposes for which the society has been brought into existence is rightly the function of the Central Bank and when the bank is giving financial accommodation at concessional rates of interest, there is no need for State help.

The enclosures received with Government memorandum referred to above are resubmitted.

I have the honour to be,

Sir,

Your most obedient servant,

K. Ramamurthy

With reference to the above, I send herewith a copy of letter C.No.360.37 dated the 1st December 1937 from the Deputy Director of Agriculture, VII Circle, Tellicherry, on the benefits derived by the ryots from the Mahali campaign conducted by this Department.

p12 infra

I have the honour to be,
S i r,
Your most obedient servant,

P H Rama Reddi

Copy of letter C.No.360.37 dated the 1st December 1937 from the Deputy Director of Agriculture, VII Circle, Tellicherry.

*****

Mahali report.

I submit hereunder the important items of benefit derived by ryots by the Mahali or Koleroga campaign conducted by the Agricultural Department.

1. The number of sprayers in use has become almost trebled, the increase being from 440 last year to 1,201 this year from January.1937.

2. The Departmental staff conducted 727 demonstrations in the preparation and spraying of bordeaux mixture in the various parts of the District.

3. There were 55 Demonstration plots maintained fully at the cost of the Department. They remained free from disease while in surrounding areas which were not treated equally well suffered from the disease in varying degrees.

4. The percentage of loss of crop to the ryots has been reduced from 37 % of last year to 13.2 % this year when the whole District is taken into consideration. In most places the loss is below 10 %.

5. A local firm of sprayer makers have been successfully induced to improve their sprayers in efficacy and quality of spraying to the level of the best imported ones and to sell them at the same time at a cheaper rate.
(1) The sprayers became readily available to the public when they wanted them.

Due to the demand created for the chemicals
(2) they are now available even in interior villages. It is

now, therefore, possible for the ryot to get them without difficulty.

6. Hundreds of local men have been trained to (3) make the mixture and do the spraying.

7. The Departmental staff spared no pains to (4) reach even the most interior and inaccessible villages in the District and demonstrate the control methods. Seventy-four percent. of the garden owners have adopted spraying their gardens in the whole District. The loss of crop, if any, has been due to-

(a) Postponing the spraying till the disease actually appeared,

(b) The poorer quality of spraying owing to their giving the work on contract paying a ratable charge on the quantity of the mixture used,

(c) The use of jets instead of sprayer to reach high trees from the ground and the consequent waste of the mixture as a result of the contract system,

(d) The larger proportion of lime added to the mixture at the ryots' own discretion against the advice of the Departmental staff,

and (e) The use of bucket sprayers operated from the ground with long hoes instead of 1¼ gallon sprayers that are operated from the top of the trees at close quarters.

8. As a result of the Departmental propaganda and the experience gained therefrom by the ryots, I can state, without fear of contradiction, that there is hardly any (5) areca garden owner who is ignorant of the control measures for preventing Mahali disease in the whole of South Kanara District.

C. No. 2407 D/37. Memorandum presented on behalf of the Pattan Division Baha Prevention Co-operative Society Ltd..

Endt. by the Registrar of C.S. & Director of Agriculture No. 2407 D/32-1 dated 19-10-37.
Letter from the Registrar of C.S. No. C. 7822/37 dated 5-12-37 and Director of Agriculture No. D-Dir. D-1640-37 dated 7-12-37,.

To u/s

Please see the memorandum presented to the Hon'ble Minister for Industries and Labour on behalf of the Pattan Division Baha Prevention Co-operative society at pages 1-2c/. The remarks of the Registrar of Co-operative Societies and the Director of Agriculture thereon will be found at pages 8-10 & 11-1 respectively.

p 2 c/ The requests of the Society are :-

(1) appointment of an Inspector of C.S. for propaganda etc.;

(2) to exempt the society from the payment of audit fees;

(3) to exempt it from payment of duty on Chemicals and Sprayers supplied to them; and (4) it may be granted loans by

Government at 3% per annum.

(1) Appointment of an Inspector for propaganda — ⓒ in file ans p 2 cf

The Registrar reports that the present Junior Inspector who was employed for the Kahabi Peri Urban Co-operative Society Ltd for a period of 6 months in G.O. 2280 Dev dated 2-10-37 may be continued for a period of nine months viz. upto 31-10-38. In this connection attention is solicited to the orders Secretary's orders at page 6 of G.O. 2222 Dev dated 8-12-36 and para 2 of the G.O. dated — which reads as follows: "Whether the circumstances stated by the Dept. in Pp 12-13 cf., viz. "it is necessary to continue the Junior Inspector to work in the society for a period of nine months i.e. till 31-10-38.

It is an unfair society & deserves encouragement. But nine months seems rather long. We may grant six months extension only. AC 11/12/37

The Director of Agriculture has set forth the progress made in combating the pest. It is for consideration whether the Junior Inspector should be continued

ⓒ in file ans p 9 cf

(2) To exempt the Society from the payment of audit fees:

(b) on p 2 cf

The Registrar is not in favour of exempting the Society wholly from the payment of audit fees. He says that he will remit it either in whole or in part from time to time with reference to the financial condition of the society. Submitted that no action is called for on this point.

page 9 cf. AC 11/12

(3) to exempt from payment of duty on chemicals and sprayers supplied to

C on p 2 cf

The Registrar states that it

b 2 cf.

; not desirable to show discrimination in favour of this Society as against private purchasers. In this connection attention is invited to the report of the Deputy Director of Agriculture, Tuticorin at pages 12-13 of

d) at p2 of (4) loans may be granted to the societies at 3% per annum.

In the circumstances stated by the Registrar at page 9-10 of the records no necessity to grant loan to the society at concessional rate of interest.

For orders.

Reg 20/1/38. Dpm 21/1

S.

The only concession that need be seriously thought of is the continuance of the Junior Insp^r for 9 months from 1-2-1938 to 1-10-38. Are these all spraying months? I am inclined to continue the Insp^r for the next spraying season.

...

Three sprayings are necessary:--

First Pre-monsoon spraying - to be started after the 15th May and completed before the 1st week of June.

Second spraying in July--August.

Third spraying in September-October. (This is necessary only in years of heavy and continuous rainfall. If the first two sprayings are done carefully at the proper time, the necessity for a third spraying may not arise).

From the 1st April to the end of October the services of a junior Inspector might be required. Till spraying actually takes place in May he will have to make preliminary arrangements to stock chemicals and sprayers in different centres.

The D.A. states that the First Pre-monsoon spraying has to be started only after the 15th May. But he suggests that the Junior Inspector may be appointed from the 1st April (six weeks in advance) in order to make preliminary arrangements to stock chemicals and spraying in different centres. Submitted that it does not seem necessary to appoint the Junior Inspector from the 1st April 1938. It will suffice if he starts work from the 1st May 1938. The Junior Inspector may therefore be permitted to work in the Society from 1-5-38 to 31-10-38 for a period of six months. Under present sanction, the Junior Inspector will remain in the Society till 31-1-1938.
